Professional Summary

Software Engineer with full stack experience, building web using Java, Html, Css, Js, C#. Passionate about clean architecture, fast UIs, and solving problems with simplicity and depth. Deeply curious about systems programming, Problem Solving and how things work under the hood.

Skills

- Languages: Java, C, Python, C#, HTML, CSS, JS
- Technologies: React, React Native, Express.js, Springboot
- Tools & Databases: MySQL, MongoDB, Git, Linux
- CS Concepts: Data Structures, Algorithms, Problem Solving, Async Programming

Experience

Compsoft Technologies– Intern Nov 2024 – May 2025

- Compsoft is a website design company transformed into a specialized digital interactive organization.
- The project identifies food items from images and predicts their salt content.
- It uses a Convolutional Neural Network (CNN) for image classification.
- The dataset used is Food-101, which contains various types of food images.

Projects

GPS BASED TOLL COLLECTION SYSTEM WITH DISTANCE TRACKING AND LICENCE RECOGNITION: Feb 2025

A GPS-based toll collection system that uses distance tracking and license plate recognition to automate toll payments. It calculates charges based on travel distance, ensuring seamless, accurate, and efficient toll collection without manual intervention.

BANK DATA BASE SYSTEM USING SQL MACHINE LEARNING: Oct 2024

I developed a Bank Database System using SQL that manages customer details, account information, transactions, and loan records. The project involved writing complex queries.

VOICE ASSISTANCE USING JAVA: May 2023

I created a Voice Assistance application using Java that recognizes voice commands to perform basic tasks like opening applications, fetching information, and responding through speech output.

Education

B.E. in Artificial Intelligence and Data Science

East West Institute of Technology, Bengaluru · Dec 2021 – May 2025

Interests

Programming, Problem Solving, Recreational Math & Science, Philosophy, Linguistics
